

rema[®]
CC 

Crown and bridge investment material
universal and accurate

Advantages at a glance

suitable for non precious alloys, precious alloys
and press ceramics

high stability

low hardness

precisely controllable expansion

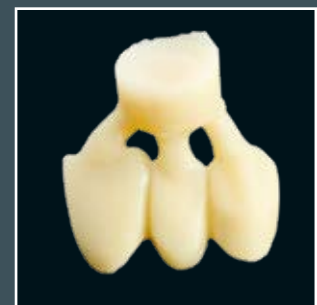

smooth casting surfaces

low casting temperatures

Controllable expansion

- just one investment material for all crown and bridge works
- suitable for speed preheating and conventional preheating
- investing with or without metal ring
- easy deinvesting and sandblasting
- accuracy of fit even for long-span bridges
- customized to your needs
- efficient processing
- high precision for implant works
- cost effectiveness

Delivery program rema® CC:

Products	Unit	REF
rema® CC Powder	6 kg (60 x 100 g)	105-840-00
rema® CC Powder	6 kg (38 x 160 g)	105-841-00
rema® CC Mixing liquid	1 l	105-845-00
rema® CC Intro-Set	10 x 160 g Powder 500 ml Mixing liquid 1 x Precision Test Specimen 1 x Measuring beaker 2 x 25 g Modeling Wax 1 x Lab timer	105-840-50
